

Environmental, Social, and Governance Policy

Purpose and Responsibilities

Royal Gold is committed to Environmental, Social, and Governance (“ESG”) integration and responsible mineral development as a means to create long-term value for its stakeholders. Royal Gold is committed to measuring our corporate ESG impacts and seeks counterparties with leading approaches to ESG practices. Our ESG Policy and practices are consistent with our Vision, Mission, Core Values and our Four ESG Pillars, which include:

- 1) Governance and Culture
- 2) Investment Strategy
- 3) Stewardship
- 4) Transparency

The ESG Policy applies to Royal Gold, Inc. and its subsidiaries (collectively, “Royal Gold”). The Compensation, Nominating, and Governance Committee (“CNGC”) of Royal Gold’s Board of Directors oversees management’s implementation of this policy and other ESG-related policies. Royal Gold Executive Management is responsible for implementing the ESG Policy. This policy will be reviewed annually.

Royal Gold acquires precious metals streams, royalties, and similar passive mineral interests (collectively, “Passive Mineral Interests”) primarily through the provision of financing to developers and operators of mining projects worldwide (“Operators”) and manages a portfolio of nearly 200 Passive Mineral Interests.

ESG Standards and Principles

While Passive Mineral Interest agreements generally do not permit Royal Gold control over projects owned by the Operators, Royal Gold promotes responsible and sustainable mineral development by taking the following actions:

- Endorsing the International Council on Mining and Metals 10 Principles of Sustainable Development and the World Gold Council Responsible Gold Mining Principles
- Requiring delivery of precious metals under metals streaming agreements meeting the London Bullion Market Association’s “Good Delivery” standards, which standards require adherence to LBMA’s “Responsible Sourcing Programme” designed to combat money laundering, terrorist financing, and human rights abuses; in this respect, Royal Gold considers Operators delivering precious metals under streaming agreements to be its “suppliers”
- Encouraging adherence to these or similar principles by the Operators
- Integrating the principles into Royal Gold’s own strategic plans and business operations that are appropriate for its business model

Royal Gold continuously evaluates ESG standards and, when appropriate, may endorse additional standards.

ESG Integration and Stewardship

Royal Gold is committed to integrating sound ESG practices in our own corporate operations. We also encourage ESG integration at the operations in which we have stream and royalty interests. When conducting due diligence concerning new acquisitions of Passive Mineral Interests, Royal Gold considers whether potential counterparties hold values and promote practices that align with this policy and our other ESG-related policies, including whether our counterparties meet the following ESG practices:

- Conduct their business and operations ethically, with integrity, transparency, and sound systems of corporate governance
- Respect internationally recognized human rights, including those relating to children's rights, child labor, human trafficking, slavery, and forced labor and who avoid complicity in human rights violations
- Comply with applicable labor protection laws related to collective bargaining, forced labor, child labor, and discrimination
- Demonstrate controls to combat bribery and corruption, including by adopting and enforcing anti-corruption policies and procedures and maintaining a functioning grievance procedure
- Commit to preserving and protecting the health, welfare, and safety of their employees
- Commit to respecting the culture, customs, traditional livelihoods, and heritage of local communities and indigenous peoples, and encourage engagement, consultation, and collaboration with local communities and indigenous peoples
- Commit to protecting the environment, including complying with (1) applicable environmental laws, regulations, and permits in all phases of exploration, development, construction, operations, reclamation, and closure work and (2) environmental management plans relating to water resources, waste management, emissions and pollution management, tailings management, biodiversity, and management of other project resources
- Respect the right to sufficient, safe, accessible, and affordable water and commit to responsible use and efficient management of water resources
- Support sustainable development of local communities through educational, health, industry, and/or other causes

When entering into new agreements for Passive Mineral Interests, Royal Gold manages these risks by obtaining, when possible, contractual rights to the following:

- Require Operators to conduct project operations in compliance with applicable laws and industry recognized best practices, including management and mitigation of environmental, social, and governance risks
- Receive regular reports concerning material developments in project operations, including written notice of labor disputes, material environmental issues, and concerns raised by local and indigenous communities
- Audit books and records and inspect project operations to assess compliance with laws and industry best practices for, among other things, environmental stewardship
- Reasonably restrain an Operator's transfer of a project to ensure that projects continue to be owned and operated by strong and reputable Operators, including those whose values and principles align with this policy

While managing the Passive Mineral Interest portfolio, Royal Gold monitors Operators' adherence to the values and principles expressed in this policy by doing the following:

- Considering publicly available information and, more particularly, data and information it receives directly from Operators under its Passive Mineral Interest agreements
- Conducting periodic project inspections of the properties covered by Royal Gold's Passive Mineral Interests
- Considering its enforcement rights where it identifies deviation from contract terms
