About Citius Pharmaceuticals, Inc.

Citius is a specialty pharmaceutical company dedicated to the development and commercialization of therapeutic products for large and growing markets using innovative, patented or proprietary formulations of previously approved pharmaceutical products. We seek new and expanded indications for previously approved pharmaceutical products as a means to achieving leading market positions or potential market exclusivity. By using previously approved drugs with substantial safety and efficacy data, we seek to reduce the

risks associated with pharmaceutical product development. We seek to achieve these objectives by utilizing the U.S. Food and Drug Administration's, or FDA's, 505(b)(2) pathway for our new drug approvals. We believe this pathway is comparatively faster, lower risk and less expensive than the FDA's traditional new drug approval pathway. In addition, we focus on obtaining intellectual property protection with the objective of listing relevant patents in the FDA Orange Book in order to limit generic competition.
