CAUTIONARY NOTE
REGARDING FORWARD-LOOKING STATEMENTS

YAMANAGOLD

CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS: This presentation contains or incorporates by reference "forward-looking statements" and "forward-looking information" under applicable Canadian securities legislation within the meaning of the United States Private Securities Litigation Reform Act of 1995. Forward-looking information includes, but is not limited to leverage ratios, information with respect to the Company's strategy, plans or future financial or operating performance, continued advancements at Jacobina, Canadian Malartic, Cerro Moro, El Peñón, Minera Florida and Agua Rica, expected production and costs, anticipated timing for the feasibility studies for Jacobina and the Agua Rica / Alumbrera integrated project, plans and objectives for future exploration and the potential for future additions to mineral resources and mineral reserves. Forward-looking statements are characterized by words such as "plan," "expect", "budget", "target", "project", "intend", "believe", "anticipate", "estimate" and other similar words, or statements that certain events or conditions "may" or "will" occur. Forward-looking statements are based on the opinions, assumptions and estimates of management considered reasonable at the date the statements are made, and are inherently subject to a variety of risks and uncertainties and other known and unknown factors that could cause actual events or results to differ materially from those projected in the forward-looking statements. These factors include the impact of general domestic and foreign business, economic and political conditions, global liquidity and credit availability on the timing of cash flows and the values of assets and liabilities based on projected future conditions, fluctuating metal prices (such as gold, copper, silver and zinc), currency exchange rates (such as the Brazilian real, the Chilean peso, the Argentine peso, and the Canadian dollar versus the United States dollar), interest rates, possible variations in ore grade or recovery rates, changes in the Company's hedging program, changes in accounting policies, changes in Mineral Reserves (as defined herein) and Mineral Resources (as defined herein), and risks related to acquisitions and/or dispositions, changes in project parameters as plans continue to be refined, changes in project development, construction, production and commissioning time frames, risks associated with infectious diseases, including COVID-19, nature and climatic condition risks, risks related to joint venture operations, the possibility of project cost overruns or unanticipated costs and expenses, potential impairment charges, higher prices for fuel, steel, power, labour and other consumables contributing to higher costs and general risks of the mining industry, including but not limited to, failure of plant, equipment or processes to operate as anticipated, unexpected changes in mine life, final pricing for concentrate sales, unanticipated results of future studies, seasonality and unanticipated weather changes, costs and timing of the development of new deposits, success of exploration activities, permitting timelines, environmental and government regulation and the risk of government expropriation or nationalization of mining operations, risks related to relying on local advisors and consultants in foreign jurisdictions, environmental risks, unanticipated reclamation expenses, title disputes or claims, limitations on insurance coverage, timing and possible outcome of pending and outstanding litigation and labour disputes, risks related to enforcing legal rights in foreign jurisdictions, vulnerability of information systems and risks related to global financial conditions, as well as those risk factors discussed or referred to herein and in the Company's Annual Information Form filed with the securities regulatory authorities in all provinces of Canada and available at www.sedar.com, and the Company's Annual Report on Form 40-F filed with the United States Securities and Exchange Commission. Although the Company has attempted to identify important factors that could cause actual actions, events or results to differ materially from those described in forward-looking statements, there may be other factors that cause actions, events or results not to be anticipated, estimated or intended. There can be no assurance that forward-looking statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. The Company undertakes no obligation to update forward-looking statements if circumstances or management's estimates, assumptions or opinions should change, except as required by applicable law. The reader is cautioned not to place undue reliance on forward-looking statements. The forward-looking information contained herein is presented for the purpose of assisting investors in understanding the Company's expected financial and operational performance and results as at and for the periods ended on the dates presented in the Company's plans and objectives and may not be appropriate for other purposes.

Non-GAAP Measures:

The Company has included certain non-GAAP financial measures and additional line items or subtotals, which the Company believes that together with measures determined in accordance with IFRS, provide investors with an improved ability to evaluate the underlying performance of the Company. Non-GAAP financial measures do not have any standardized meaning prescribed under IFRS, and therefore they may not be comparable to similar measures employed by other companies. The data is intended to provide additional information and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS. The non-GAAP financial measures included in this presentation include: Free cash flow, cash costs per gold equivalent ounce sold, all-in sustaining costs per gold equivalent ounce sold. Please refer to section 11 of the Company's current annual Management's Discussion and Analysis, which is filed on SEDAR and includes a detailed discussion of the usefulness of the non-GAAP measures. The Company believes that in addition to conventional measures prepared in accordance with IFRS, the Company and certain investors and analysts use this information to evaluate the Company's performance. In particular, management uses these measures for internal valuation for the period and to assist with planning and forecasting of future operations.

Qualified Persons

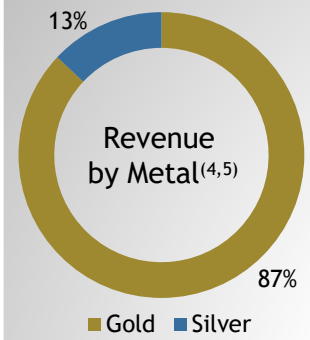

Scientific and technical information contained in this presentation has been reviewed and approved by Sébastien Bernier (Senior Director, Geology and Mineral Resources). Sébastien Bernier P.Geo is an employee of Yamana Gold Inc. and a "Qualified Person" as defined by Canadian Securities Administrators' National Instrument 43-101 - Standards of Disclosure for Mineral ProjectsData verification related to certain scientific and technical information disclosed herein in connection with Yamana's material properties can be found in the Company's technical reports entitled "Technical Report on the El Peñón Mine, Antofagasta Region (II), Chile" dated March 2, 2018, "Technical Report on the Jacobina Mine Complex, Bahia State, Brazil" dated September 30, 2019, and "Technical Report on the Mineral Resource and Mineral Reserve Estimates for the Canadian Malartic Property" dated August 13, 2014 available under the Company's profile on SEDAR at www.sedar.com and on the Company's website. The information presented herein was approved by management of Yamana Gold on April 16, 2020.

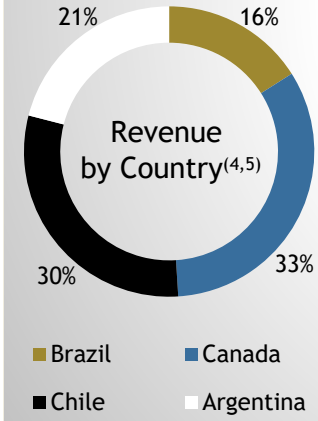

All amounts are expressed in United States dollars unless otherwise indicated.

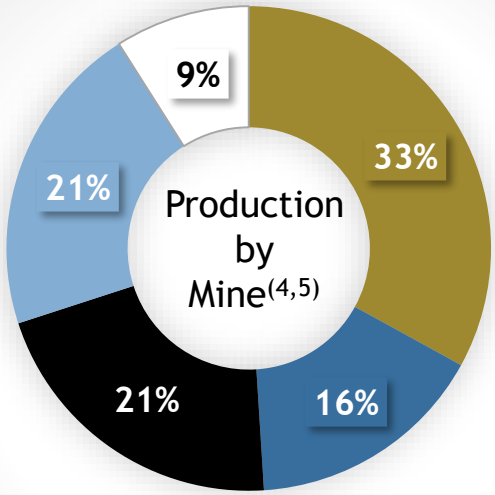

DOMINANT GOLD PRODUCER
PORTFOLIO FOR THE CURRENT AND NEXT CYCLE

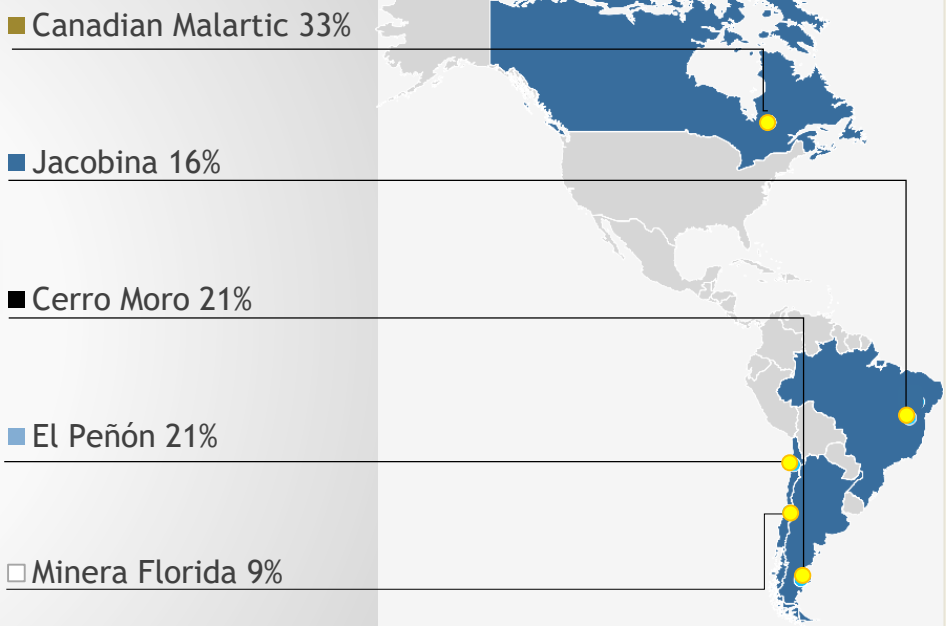

YAMANAGOLD

Production Platform of Over 1 Million Gold-Equivalent Ounces (1,2)

AISC BELOW $1,000/GEO(1,2,3)

1. Gold equivalent ounces include gold plus silver at a ratio of 86.02:1 for 2019.
2. Based on year-end 2019 total Yamana results.
3. A non-GAAP measure, additional line item or subtotal. A reconciliation of the IFRS measure to the non-GAAP measure can be found at www.yamana.com/Q42019.
4. Based on the run rate estimated at the start of the year from original 2020 production guidance and estimated 2020 run rate for revenue contribution by metal and by country.
5. See Cautionary Note Regarding Forward-Looking Information

DOMINANT GOLD PRODUCER
PORTFOLIO FOR THE CURRENT AND NEXT CYCLE

YAMANAGOLD

- Asset Quality
- Ability to Deliver on Results
- Country Risk Profile
- Financial Strength
- Providing a Strengthening Return to Shareholders

- High Quality Diversified Portfolio with Long Life Assets
- Track Record of Consistency
- Operating in Mining Friendly Jurisdictions
- Strong Balance Sheet and Increasing Free Cash Flows
- Announced 2 Dividend Increases, Cumulatively Increasing by 150% and a Cash Reserve Fund for Dividends

1. Based on 2019 GEO production and mineral reserve estimates including gold plus silver with silver converted to a gold equivalent at a ratio of 86.02:1 for 2019.

STRATEGIC OPPORTUNITIES
CANADIAN MALARTIC

YAMANAGOLD

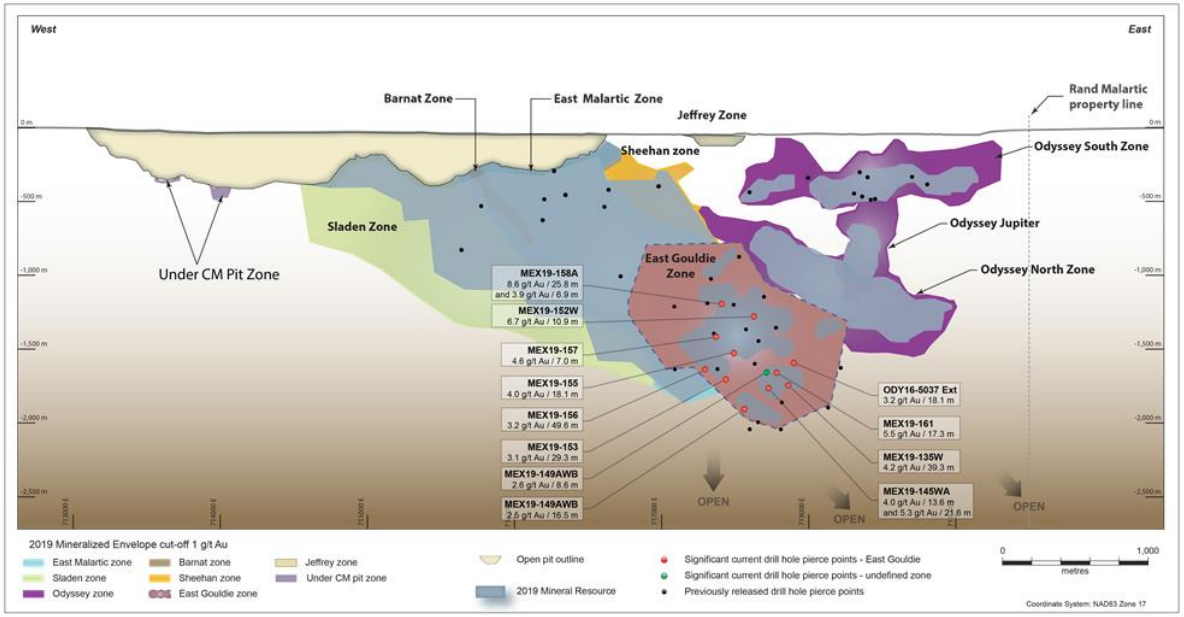

CANADIAN MALARTIC
(50% Owned)

Strategic Upside(1)

- Exploration programs are evaluating several deposits and prospective areas including the new East Gouldie discovery, as well as Odyssey, East Malartic, Sladen, Sheehan and Rand.
- Indications suggest that East Gouldie, East Malartic and Sladen zones are converging at depth, increasing the level of confidence in the economic potential of overall mineral resources below 1,000 meters.
- Remains open in all directions.

East Gouldie

Canadian Malartic and Odyssey – Composite Longitudinal Section

1. See Cautionary Note Regarding Forward-Looking Information and Company press releases dated September 9, 2019 regarding Canadian Malartic.
2. As at December 31, 2019. Mineral resources that are not mineral reserves do not have demonstrated economic viability. Further details including tonnes and grade are presented in slides 28 – 31.

STRATEGIC OPPORTUNITIES
JACOBINA AND EL PEÑÓN

YAMANAGOLD

JACOBINA

Strategic Upside(1)

- A two phase expansion which first, has the potential to take the mine to a sustainable production rate of 170,000 ounces per year and on approval of Phase 2, up to 225,000 ounces per year.
- The targeted throughput of 6,500 tpd for Phase 1 was achieved in Q1 2020, a full quarter ahead of schedule with further benefits from additional plant modifications expected.

EL PEÑÓN

Strategic Upside(1)

- Mineral reserves replaced 2019 depletion, increasing 15% for gold and 21% for silver. Gold measured and indicated mineral resources increased by 66%, while silver increased by 70%.
- Developed a new structural interpretation of faulting in the Angelina sector of the Deep Orito vein in 2019.
- Completed a machine-learning study in mid-2019 that generated numerous exploration targets that are advancing via systematic surface exploration.

1. See Cautionary Note Regarding Forward-Looking Information and Company press releases dated September 5, 3019 regarding Jacobina and November 25, 2019 regarding El Peñón.

DELIVERING FINANCIAL PERFORMANCE
INCREASING FREE CASH FLOW PROFILE

YAMANAGOLD

Revenue	Cash flow from operating activities Before change in net working capital(1)	Net Free Cash Flow(1)	Free Cash Flow(1) Before dividend and debt repayments
FOURTH QUARTER FINANCIAL RESULTS			
$383.8 M	$176.6 M	$136.5 M	$73.4 M
THIRD QUARTER FINANCIAL RESULTS			
$357.8 M	$152.4 M	$99.9 M	$29.4 M

Q1 2020 to be the fourth consecutive quarter of positive free cash flow generation contributing to a further ~$15M reduction in net debt(1) during the quarter

1. A non-GAAP measure, additional line item or subtotal. A reconciliation of the IFRS measure to the non-GAAP measure can be found at www.yamana.com/Q42019 and www.yamana.com/Q32019.

FIRST QUARTER 2020
PRELIMINARY RESULTS[1]

YAMANAGOLD

	Q1 2020 Preliminary Results	
	Gold Production	**Silver Production**
Canadian Malartic (50% basis)	64,763	-
Jacobina	43,938	-
El Peñón	42,230	1,355,910
Cerro Moro	18,743	1,374,941
Minera Florida	22,563	-
Total	**192,238**	**2,730,851**

Operational Highlights:

- **Jacobina:** Another consecutive quarter of record production with 43,938 ounces of gold. Average throughput exceeded 6,500 tonnes per day a full quarter ahead of schedule for the Phase 1 optimization and without benefits from further plant modifications still to be completed.
- **El Peñón:** Produced 42,230 ounces of gold and 1.355 million ounces of silver during the quarter, ahead of production targets.
- **Canadian Malartic:** Produced 64,763 ounces of gold (50% basis). The Government of Quebec authorized the resumption of mining activities as of April 15, 2020. The resumption of mining will occur over a period of several weeks with full attention to the health and safety of returning employees, contractors, and suppliers.
- **Minera Florida:** Maintained momentum from its strong finish to 2019 producing 22,563 ounces of gold, ahead of budget.
- **Cerro Moro:** Produced 18,743 ounces of gold and 1.374 million ounces of silver. The government has declared mining an essential service on April 3, 2020, allowing the mine to resume normal operations from its previously reduced production rate. Cerro Moro is now in the process of remobilizing.

1. See Cautionary Note Regarding Forward-Looking Information.

Additional Financial Highlights:

- **Further Reduction In Net Debt[1]:**
  - Achieved a further reduction in net debt[1] of approximately $15 million, in line with budget.
- **Financial Strength:**
  - Well capitalized, 2019 year end cash and cash equivalents were $158.8 million with another positive quarter of free cash flow generation.
  - Repaid the scheduled $56 million in private placement debt during the quarter. At the present time, no further pending scheduled debt repayments or significant capital commitments. Its next scheduled debt repayment is due in March, 2022.
  - As a precaution given the uncertainty surrounding the global pandemic, drew down $200 million of the $750 million revolving credit facility however, there are no plans to utilize these funds.
- **Foreign Exchange Cost Tailwinds:**
  - Average foreign exchange rates of operating currencies were weaker in the quarter, and at quarter end, than those assumed for guidance purposes, having a favourable impact on operating costs.
  - Entered into Canadian dollar zero-cost contracts totaling C$91.2 million, split evenly between May and December of 2020, allowing participation of exchange rate movements between the two strikes of 1.38 and 1.45 and locking in a significant benefit to the rate of 1.32 used in guidance.

1. A non-GAAP measure, additional line item or subtotal. A reconciliation of the IFRS measure to the non-GAAP measure can be found at www.yamana.com/Q42019

Q2 2020 OUTLOOK[1]
MAINTAINING EXPECTATIONS FOR CASH FLOW GENERATION

YAMANAGOLD

Returning to Full Production

- Cerro Moro currently remobilizing and Canadian Malartic resuming mining activity following the Government of Quebec's authorization as of April 15, 2020. No other impacts to operations.
- In full compliance with orders from local authorities thereby expecting to ramp up operations at Cerro Moro and Canadian Malartic progressively over the course of the quarter.
- Production is not linear, and as previously indicated, Q4 is expected to be the strongest quarter of the year.

Maintaining Expectations for Cash Flow Generation

- Relative to initial Q2 production and cost targets which were set at the beginning of the year, lower Q2 production and higher Q2 costs are now expected. However, this operational impact to Q2 in terms of cash flow, is expected to be offset by higher gold prices which are currently exceeding budget assumptions.

1. See Cautionary Note Regarding Forward-Looking Information.

STRATEGIC ASSETS
AGUA RICA AND PROJECT PORTFOLIO

YAMANAGOLD

Agua Rica
A Significant Value Opportunity

- Large-scale copper, gold, silver, molybdenum deposit located in Catamarca, Argentina.
- Agreement to develop and operate using the existing infrastructure at the Alumbrera mine in place with development significantly de-risked.
- Value continues to increase as project advances. Feasibility study is expected to be completed in 2020.[1]
- Evaluating strategic options and partnerships to achieve the objective of maximizing value.

Project Portfolio
Further Opportunities to Unlock Value and in Some Cases, Cash

- In addition to Agua Rica, ownership in a portfolio of projects and development assets which provide a pipeline of opportunities to advance and increase value.
- Some may be better suited for advancing and ultimately developing, others may create more value by monetizing.

1. See Cautionary Note Regarding Forward-Looking Information

STRATEGIC ASSETS
OWNERSHIP INTERESTS

YAMANAGOLD

Equinox Gold

On April 13th, 2020 announced the sale of Equinox Gold shares and warrants for up to C$201 million.

- 12,000,000 units at C$10.00/unit, each unit includes
  - 1 common share of Equinox
  - 0.5 of a common share purchase warrant to acquire shares at C$13.50 for 9 months from issue date
- Prior to the Sale, Yamana held 19,236,380 shares and 8,345,501 warrants to acquire shares at C$11.18 until May 24, 2020.
- With the initial proceeds of C$120,000,000 (US$86,000,000) preliminary cash and net debt, on a pro forma basis, were over US$400,000,000 and approximately US$790,000,000, respectively.

Nomad Royalty

- On February 23rd, 2020 Yamana announced an agreement to sell its royalty portfolio for total consideration of $65 million including a 13% interest in Nomad Royalty, a new royalty company created with a high quality experienced management team(2).

We Manage our Portfolio for Value Optimization

1. Ownership interest in Equinox Gold on a fully-diluted basis, assuming the exercise of all currently outstanding convertible securities,
2. See Cautionary Note Regarding Forward-Looking Information

FURTHER OPTIONALITY
GENERATIVE EXPLORATION PROGRAM(1)

YAMANAGOLD

Key Objectives:

- Advance one or more projects to an inferred mineral resource of at least 1.5 million ounces of gold within the next three years.
- Advance at least one project to a mineral inventory large enough to support a mine with 150,000 ounces of gold per year for at least eight years.

Investing $14 million in 2020 which is currently under evaluation due to the ongoing global pandemic, then investing $18 million in 2021 and $21 million for 2022, totaling $53 million with funding from monetizations of non-cash producing assets, flow-through funding agreements and expected joint venture opportunities, particularly for copper-gold projects.

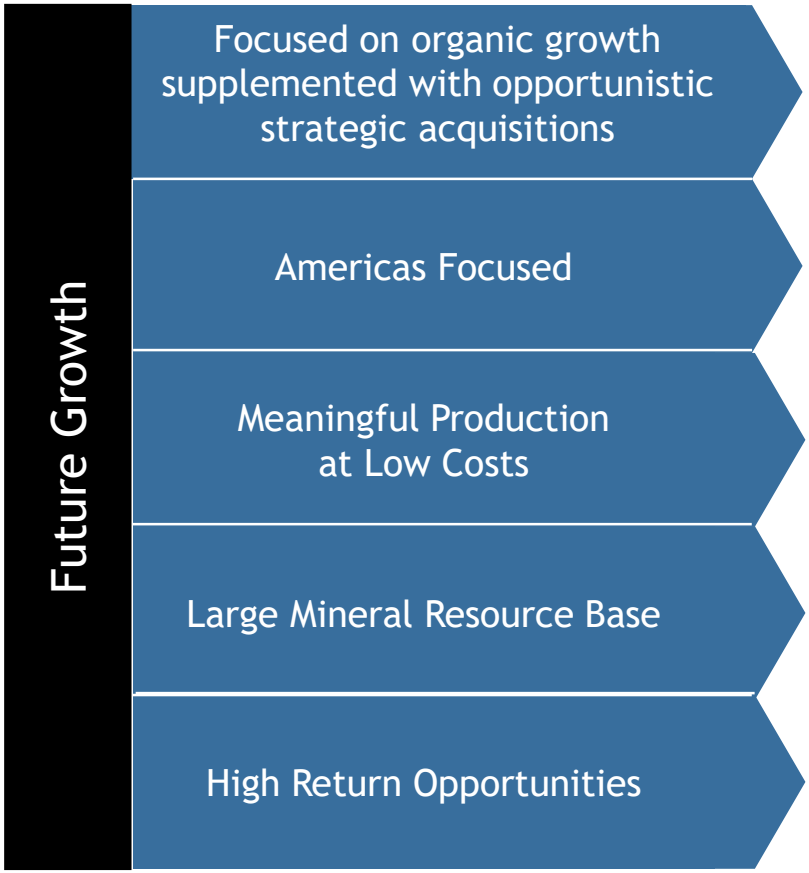

Represents Excellent Value Enhancing Initiative Creating Future Organic Growth(1)

Tier 1	Projects with well-defined gold mineral resources and opportunities to grow to a potentially economic threshold in the next 3 years
Tier 2	Projects that have achieved significant drill intercepts and whose geology along with other factors support rapid resource growth
Tier 3	Highly prospective projects with known mineralization defined with rock and soil geochemistry that warrant future drill testing

1. See Cautionary Note Regarding Forward-Looking Information.

PORTFOLIO MANAGEMENT
FUTURE GROWTH(1)

YAMANAGOLD

- Internal growth: Jacobina phased expansion, underground mine at Canadian Malartic, generative exploration program
- Past strategic acquisitions: Canadian Malartic, which was opportunistically acquired off-cycle
- Opportunities for growth with a focus in the Americas
- Preference for annual production of 150,000 ounces for at least 8 years, at costs below our AISC(2) average
- Preference for mineral resource base of at least 1.5 million ounces
- All opportunities and projects compete against one another for capital with only the highest return opportunities advancing

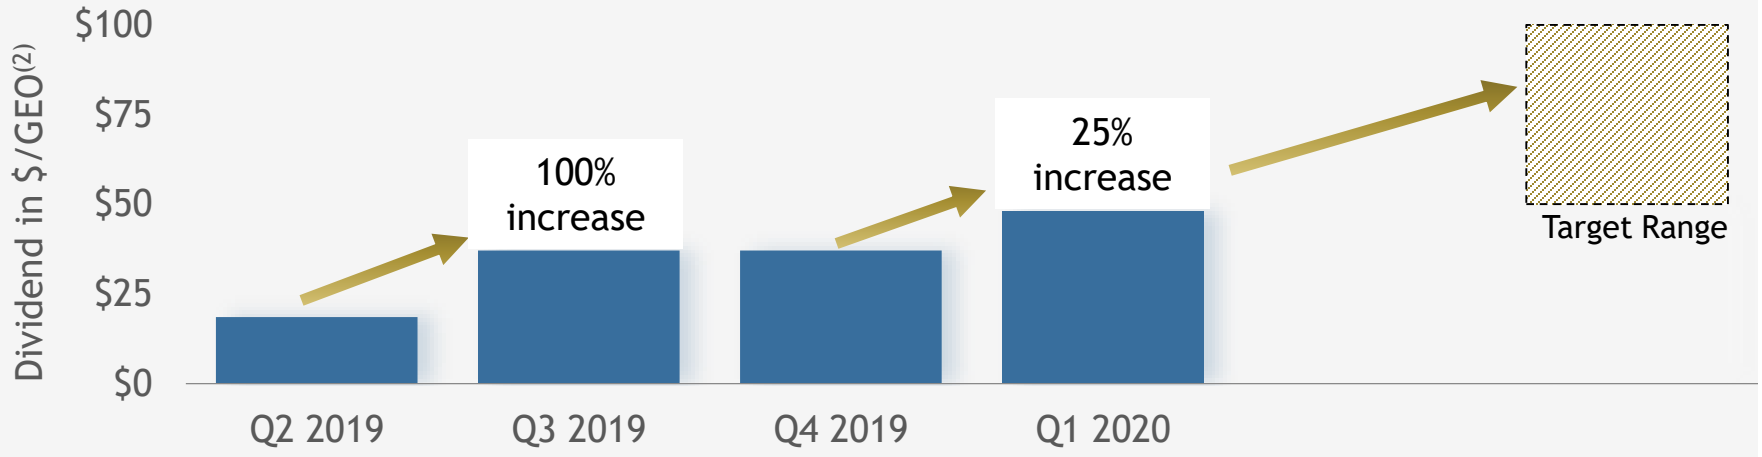

1. See Cautionary Note Regarding Forward-Looking Information
2. A non-GAAP measure, additional line item or subtotal. A reconciliation of the IFRS measure to the non-GAAP measure can be found at www.yamana.com/Q42019

DIVIDENDS REMAIN KEY TO OUR STRATEGY
FOR PROVIDING RETURNS TO SHAREHOLDERS[1]

YAMANAGOLD

Maximizing return on investments to shareholders through sustainable dividends

- Dividends increased 150% to $0.05/share annually for Q1 2020 compared to dividends paid during Q3 2019.
- Adopted a policy of treating dividends, on a per ounce basis, and targeting increasing dividends to be between $50 per GEO[2] and $100 per GEO[2].
- Established a program to create a reserve fund to maintain sustainability of the dividend for a minimum of three years.
- In the twelve-year period since 2007, the Company has paid more than $900 million in dividends.

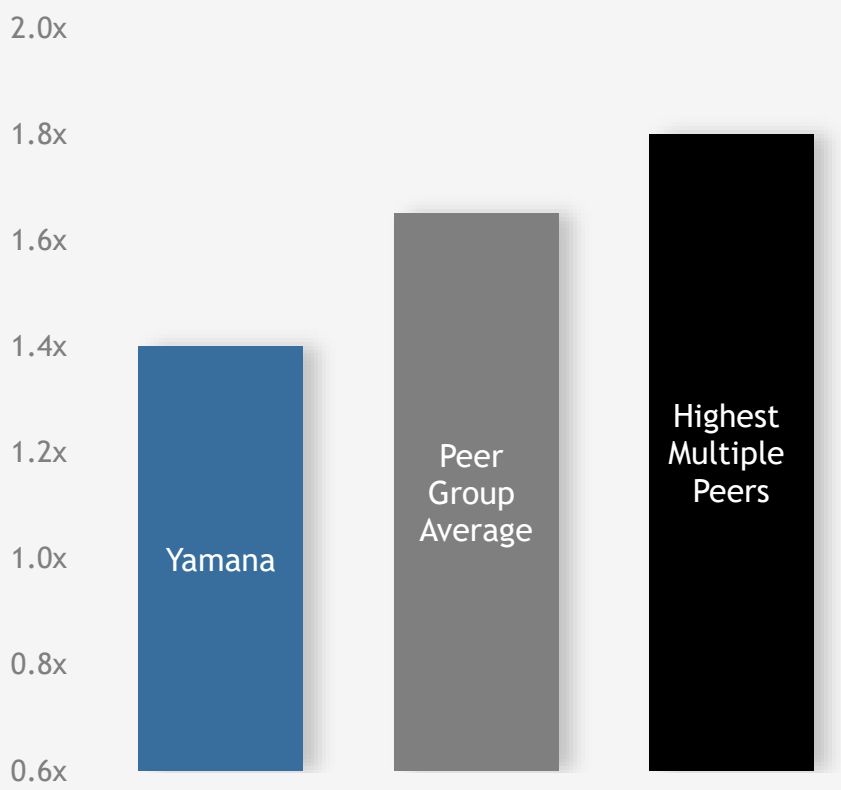

1. See Cautionary Note Regarding Forward-Looking Information.
2. Gold Equivalent Ounce ratio assumes gold ounces plus the equivalent of silver ounces using a ratio of 86.10

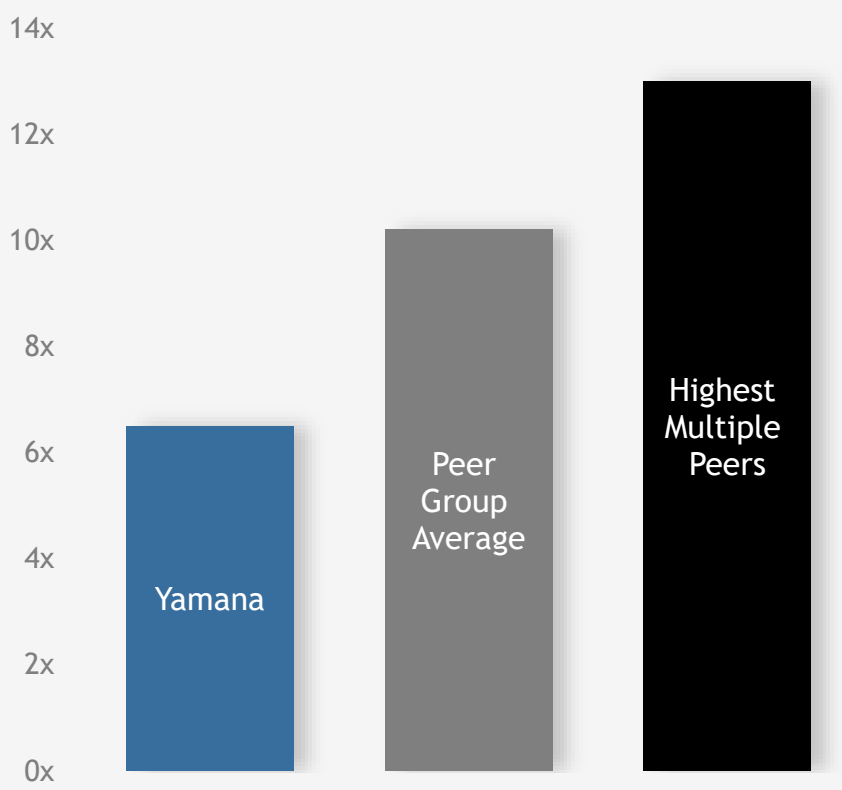

INVESTMENT PROPOSITION
RERATING HAS COMMENCED AND IS ACCELERATING

ENVIRONMENTAL, SOCIAL AND GOVERNANCE
STRATEGY & RESULTS

YAMANAGOLD

Environment
- All sites have Climate Change, Water and Biodiversity Risk Assessments
- 75% of water use is reused or recycled
- 7% decrease in GHG intensity over 4 years

Social
- Social License to Operate Index
- 99% host country employment
- 99% host country procurement
- Community Participatory monitoring at relevant sites

Health & Safety
- 29% decrease in TRIR over 3 years
- 36% decrease in LTIFR in 2018
- 13% below top performing peers in TRIR
- Focus on leading indicators

External Recognition
- Externally assured that our gold is Conflict Free
- Included in Jantzi Social Index for 10 consecutive years
- Corporate ESG performance ranked in top 10% of peers by ISS (2019)

Governance
- Board oversight of sustainability topics
- Compensation linked to sustainability performance
- 50% of Board of Directors are female

Management Systems
- All sites ISO/OHSAS & Cyanide Code certified
- 2020 Implementation of *Responsible Gold Mining Principles*
- 2020 Implementation of *Towards Sustainable Mining*

Tailings
- No upstream tailings dams
- Direct reporting from tailings director to CEO and Executive Chairman
- Regular reports to Board of Directors
- 2 annual dam safety external audits
- Regular internal safety audits

1. Data presented herein is from 2018 unless indicated otherwise

RESPONSIBLE GOLD MINING PRINCIPLES
ADVANCING TOWARDS FULL COMPLIANCE

YAMANAGOLD

- An over-arching framework that sets out clear expectations as to what constitutes responsible gold mining.
- Designed to provide confidence to investors and supply chain participants that gold has been produced responsibly.
- Implementing companies will be required to publicly disclose conformance and obtain external assurance on this.
- Reflects the commitment of the world's leading gold mining companies to responsible mining.

Yamana Gold Inc. Mineral Reserve and Mineral Resource Reporting Notes:		
Mine	**Mineral Reserves**	**Mineral Resources**
Arco Sul	N/A	Price assumption: $1,500 gold
		2.5 g/t gold cut-off
Canadian Malartic (50%)	Price assumption: $1,200 gold	Price assumption: $1,200 gold
	Open pit cut-off grades range from 0.40 to 0.43 g/t gold	Cut-off grades range from 0.40 to 0.43 g/t gold inside pit to 1.0 g/t gold outside or below pit
	Metallurgical recoveries for gold averaging 90.2%	Underground Cut-off grade at Odyssey is 1.15 to 1.35 g/t gold (stope optimized)
		Underground Cut-off grade at East Malartic is 1.30 to 1.60 g/t gold (stope optimized)
		Underground Cut-off grade at East Gouldie is 1.35 to 1.55 g/t gold (stope optimized)
Cerro Moro	Price assumption: $1,250 gold and $18.00 silver	
	Open pit cut-off at 123 NSR $/ton and Underground cut-off at 215 NSR $/ton	Cut-off grade at 3.0 g/t Aueq.
	Metallurgical recoveries average 95% for gold and 93% for silver	
El Peñón	Price Assumption: $1,250 gold, $18.00 silver	Price Assumption: $1,250 gold, $18.00 silver
	Open Pit cut-off at $43.15/t	Underground cut-off at $95.93/t, which corresponds to 75% of the cut-off value used to estimate the mineral reserves
	Underground cut-off at $127.90/t	Mineral Resources contained in tailings and stockpiles reported at cut-offs of 0.50 g/t and 0.79 g/t gold equivalent respectively
	Low grade stockpiles cut-off 0.90 g/t gold equivalent	Metallurgical recoveries for underground ores range from 77.0% to 96.9% for gold and from 63.0% to 94.4% for silver
	Metallurgical recoveries for open pit ores range from 86.56% to 90.29% for gold and from 83.53% to 86.95% for silver	Metallurgical recoveries for tailings estimated to be 60% for gold and 30% for silver
	Metallurgical recoveries for underground ores range from 77.0% to 96.9% for gold and from 63.0% to 94.4% for silver	Metallurgical recoveries for stockpiles estimated to be 88.0% for gold and 80.8% for silver
	Metallurgical recoveries for low grade stockpiles are 95.2% for gold and 83.0% for silver	
Jacobina	Price assumptions: $1,250 gold	
	Underground reserves are reported at variable cut-off grades by zone ranging from 1.12 g/t gold to 1.30 g/t gold	Underground cut-off grade is 1.00 g/t gold, which corresponds to 75% of the cut-off used to estimate the mineral reserves
	Mineral reserves includes lower grade supplemental ore which is incorporated into the life of mine plan, and which was previously categorized as mineral resources	Minimum mining width of 1.5 meters, considering internal waste and dilution
	Metallurgical recovery is 96%	
Jeronimo (57%)	Price Assumption:$900 gold	
	Cut-off grade at 2.0 g/t gold	Cut-off grade at 2.0 g/t gold
	Metallurgical recovery for gold is 86%.	
La Pepa	N/A	Price Assumption: $780 gold
		Cut-off grade at 0.30 g/t gold
Lavra Velha	N/A	Price assumption: $1,300 gold and $3.50 copper
		Cut-off grade at 0.2 g/t gold and 0.1% copper

Yamana Gold Inc. Mineral Reserve and Mineral Resource Reporting Notes:		
Mine	**Mineral Reserves**	**Mineral Resources**
Minera Florida	Price assumption: $1,250/oz gold, $18.00/oz silver and $1.25/lb Zn.	Price assumption: $1,250/oz gold, $18.00/oz silver and $1.25/lb Zn.
	Underground cut-offs for Las Petaguas Zone $91.48/t and for the Core Mine Zones $92.86/t	Underground Mineral Resources are estimated at a cut-off grade of 2.50 g/t gold equivalent
	Metallurgical recoveries are 91.36% for gold, 62.93% for silver and 75.38% for zinc	Metallurgical recoveries are 91.36% for gold, 62.93% for silver and 75.38% for zinc
Monument Bay	N/A	Price Assumption: $1,200 gold
		Cut-off grades are 0.4 g/t gold and 0.7 g/t gold for the open pits and 4.0 g/t gold for underground
Suyai	N/A	5.0 g/t gold cut-off inside mineralized wireframe modeling
Agua Rica	Mineral Reserves are estimated using a variable metallurgical recovery.	Mineral Resources are estimated using a variable metallurgical recovery.
	Average metallurgical recoveries of 86% Cu, 35% Au, 43% Ag, and 44% Mo were considered.	LOM average metallurgical recoveries of 86% Cu, 35% Au, 43% Ag, and 44% Mo were considered.
	Open pit Mineral Reserves are reported at a variable cut-off value averaging $8.42/t, based on metal price assumptions of US$3.00/lb Cu, $1,250/oz Au, $18/oz Ag, and $11/lb Mo. A LOM average open pit costs of $1.72/t moved, processing and G&A cost of $6.70/t of run of mine processed. The strip ratio of the mineral reserves is 1.7 with overall slope angles varying from 39° to 45° depending on the geotechnical sector.	Mineral Resources are constrained by an optimized pit shell based on metal price assumptions of $4.00/lb Cu, $1,600/oz Au, $24/oz Ag, and $11/lb Mo. Open pit Mineral Resources are reported at a variable cut-off value which averages $8.42/t milled with overall slope angles varying from 39° to 45° depending on the geotechnical sector.
Alumbrera Projects (12.5%)		
Alumbrera Deposit	Price assumption: $1,250 gold, $2.91 copper	Price assumption: $1,250 gold, $2.95 copper.
	Underground cut-off at 0.5% copper equivalent	Underground cut-off at 0.43% copper equivalent
	Metallurgical recoveries average 87.85% for copper and 72.31% for gold	
Bajo El Durazno Deposit	N/A	Price assumption: $1,250 gold, $2.95 copper.
		0.74 g/t Aueq cut-off within underground economic envelope

1. Metal Price, Cut-off Grade, Metallurgical Recovery.
2. All Mineral Reserves and Mineral Resources have been calculated in accordance with the standards of the Canadian Institute of Mining, Metallurgy and Petroleum and National Instrument 43-101, other than the estimates for the Alumbrera mine which have been calculated in accordance with the JORC Code which is accepted under NI 43-101.
3. All Mineral Resources are reported exclusive of Mineral Reserves.
4. Mineral Resources which are not Mineral Reserves do not have demonstrated economic viability.
5. Mineral Reserves and Mineral Resources are reported as of December 31, 2019.
6. For the qualified persons responsible for the Mineral Reserve and Mineral Resource estimates at the Company's material properties, see the qualified persons list below.

Property	Qualified Persons for Mineral Reserves	Qualified Persons for Mineral Resources
Canadian Malartic	Sylvie Lampron, Eng., Canadian Malartic Corporation	Pascal Lehouiller, P. Geo, Canadian Malartic Corporation
El Peñón	Sergio Castro, Registered Member of the Chilean Mining Commission, Yamana Gold Inc.	Dominic Chartier, P.Geo, Yamana Gold Inc.
Jacobina	Esteban Chacon, Registered Member of the Chilean Mining Commission, Yamana Gold Inc.	Renan Garcia Lopes, MAusIMM CP(Geo), Yamana Gold Inc.
