

## New Gold Provides Update on Rainy River

**May 1, 2019 – New Gold Inc. (“New Gold” or the “Company”) (TSX and NYSE American: NGD)** today provides an update on the operation of the mill at the Rainy River Mine, located in northern Ontario.

In the late afternoon on April 24, management at the Rainy River mine temporarily shut down the mill to assess a buildup of water in the Tailings Management Area (TMA). Upon further examination over the ensuing days, it was determined that approximately 700,000 m<sup>3</sup> of excess water was stored in the TMA, driven by the rapid spring melt and large snow pack this year in northern Ontario. To manage the excess water, the Company is transferring water from the TMA to the Water Management Pond (WMP). Extra pumping capacity has been installed and more pumping capacity is being added to expedite the water transfer. It is expected that the mill will be fully operational within 5 days, depending on precipitation levels during this period. The Company is working with the relevant regulators to expedite the deposition of tailings into Cell 3, which would significantly improve overall TMA water management. The Company has taken advantage of the mill shutdown to accelerate maintenance activities that had been planned for later in May.

Mining and crushing operations have not been impacted and continue at planned levels, with ore being stockpiled and segregated for processing when the mill restarts. Management anticipates that any production delays will be offset so that the Company will still be in a position to achieve its annual production guidance.

“Management is addressing the issue of excess water appropriately and in a manner that is consistent with our commitment to protecting our environment. We remain focused on executing our current mine plan and are confident that the mill will resume normal operations soon,” stated Renaud Adams, CEO.

### About New Gold Inc.

New Gold is a Canadian-focused intermediate gold mining company. The Company has a portfolio of two core producing assets in top-rated jurisdictions, the Rainy River and New Afton Mines in Canada. The Company also operates the Cerro San Pedro Mine in Mexico (which transitioned to residual leaching in 2016). In addition, New Gold owns 100% of the Blackwater project located in Canada. New Gold’s objective is to be a leading intermediate gold producer, focused on the environment and social responsibility. ### Cautionary Note Regarding Forward-Looking Statements

Certain information contained in this news release, including any information relating to New Gold’s future financial or operating performance are “forward looking”. All statements in this news release, other than statements of historical fact, which address events, results, outcomes or developments that New Gold expects to occur are “forward-looking statements”. Forward-looking statements are statements that are not historical facts and are generally, but not always, identified by the use of forward-looking terminology such as “plans”, “expects”, “is expected”, “budget”, “scheduled”, “targeted”, “estimates”, “forecasts”, “intends”,

“anticipates”, “projects”, “potential”, “believes” or variations of such words and phrases or statements that certain actions, events or results “may”, “could”, “would”, “should”, “might” or “will be taken”, “occur” or “be achieved” or the negative connotation of such terms. Forward-looking statements in this news release include, among others, statements with respect to the timing of resumption of mill operations and deposition of tailings into TMA Cell 3, and the impact of the shutdown on production and annual guidance.

All forward-looking statements in this news release are based on the opinions and estimates of management as of the date such statements are made and are subject to important risk factors and uncertainties, many of which are beyond New Gold’s ability to control or predict. Certain material assumptions regarding such forward-looking statements are discussed in this news release, New Gold’s latest annual management’s discussion and analysis (“MD&A”), Annual Information Form and Technical Reports filed at [www.sedar.com](http://www.sedar.com) and on EDGAR at [www.sec.gov](http://www.sec.gov). In addition to, and subject to, such assumptions discussed in more detail elsewhere, the forward-looking statements in this news release are also subject to the following assumptions: (1) there being no significant disruptions affecting New Gold’s operations; (2) political and legal developments in jurisdictions where New Gold operates, or may in the future operate, being consistent with New Gold’s current expectations; (3) the accuracy of New Gold’s current mineral reserve and mineral resource estimates; (4) the exchange rate between the Canadian dollar and U.S. dollar, and to a lesser extent, the Mexican Peso, being approximately consistent with current levels; (5) prices for diesel, natural gas, fuel oil, electricity and other key supplies being approximately consistent with current levels; (6) equipment, labour and materials costs increasing on a basis consistent with New Gold’s current expectations; (7) arrangements with First Nations and other Aboriginal groups in respect of the Rainy River mine and Blackwater project being consistent with New Gold’s current expectations; (8) all required permits, licenses and authorizations being obtained from the relevant governments and other relevant stakeholders within the expected timelines and the absence of material negative comments during the applicable regulatory processes; and (9) water pumps at Rainy River performing in line with expectations..

Forward-looking statements are necessarily based on estimates and assumptions that are inherently subject to known and unknown risks, uncertainties and other factors that may cause actual results, level of activity, performance or achievements to be materially different from those expressed or implied by such forward-looking statements. Such factors include, without limitation: significant capital requirements and the availability and management of capital resources; additional funding requirements; price volatility in the spot and forward markets for metals and other commodities; fluctuations in the international currency markets and in the rates of exchange of the currencies of Canada, the United States and, to a lesser extent, Mexico; discrepancies between actual and estimated production, between actual and estimated mineral reserves and mineral resources and between actual and estimated metallurgical recoveries; risks related to early production at the Rainy River Mine, including failure of equipment, machinery, the process circuit or other processes to perform as designed or intended; fluctuation in treatment and refining charges; changes in national and local government legislation in Canada, the United States and, to a lesser extent, Mexico or any other country in which New Gold currently or may in the future carry on business; taxation; controls, regulations and political or economic developments in the countries in which New Gold does or may carry on business; the speculative nature of mineral exploration and development, including the risks of obtaining and maintaining the validity and enforceability of the necessary licenses and permits and complying with the permitting requirements of each jurisdiction in which New Gold operates, the lack of certainty with respect to foreign legal systems, which may not be immune from the influence of political pressure, corruption or other factors that are inconsistent with the rule of law; the uncertainties inherent to current and future legal challenges New Gold is or may become a party to; diminishing quantities or grades of mineral reserves and mineral resources; competition; loss of key employees; rising costs of labour, supplies, fuel and equipment; actual results of current exploration or reclamation activities; uncertainties inherent to mining economic studies; changes in project parameters as plans continue to be refined; accidents; labour disputes; defective title to mineral claims or property or contests over claims to mineral properties; unexpected delays and costs inherent to consulting and accommodating rights of Indigenous groups; risks, uncertainties and unanticipated delays associated with obtaining and maintaining necessary licenses, permits and authorizations and complying with permitting requirements. In addition, there are risks and hazards associated with the business of mineral exploration, development and mining, including environmental events and hazards, industrial accidents, unusual or unexpected formations, pressures, cave-ins, excess water, flooding and gold bullion losses and risks associated with the start of production of a mine, such as Rainy River, (and the risk of inadequate insurance or inability to obtain insurance to cover these risks) as well as “Risk Factors” included in New Gold’s Annual Information Form, MD&A and other disclosure documents filed on and available at [www.sedar.com](http://www.sedar.com) and on EDGAR at [www.sec.gov](http://www.sec.gov). Forward-looking statements are not guarantees of future performance, and actual results and future events could materially differ from those anticipated in such statements. All of the forward-looking statements contained in this news release are qualified by these cautionary statements. New Gold expressly disclaims any intention or obligation to update or revise any forward-looking statements whether as a result of new information, events or otherwise, except in accordance with applicable securities laws.
