## CEO COMMENTARY AND OUTLOOK

Chief Executive Officer Lachie Given stated, "We continue to execute on our three-year strategic plan and closed the fiscal year with another outstanding quarter. PLO hit a record high driving increases in pawn service charges. Strong sales margins with a relentless focus on optimizing store operating costs translated into a significant increase in earnings for the fourth quarter and full year. Inflation and other economic pressures have had a significant impact on our customers' finances, and we are able to help them by providing a unique and essential service to address their short-term cash needs. In addition, we provide an environmentally friendly retail experience at our neighborhood re-commerce stores for our expanding customer base of environmentally and cost-conscious consumers.
"During the fourth quarter, we opened 16 de novo stores in Latin America bringing the total for 2022 to 28 . In the US, we acquired three stores during fiscal 2022 and another nine stores in the Houston, Texas area after the end of the year. The rollout of the EZ+ Rewards program continues to be a success, now yielding 1.9 million members across all geographies.
"We are pleased that our strong cash flow and balance sheet has enabled us to return value to shareholders through share repurchases of $\$ 3.0$ million as of November 15.
"During the quarter we celebrated a team member appreciation week, created engagement action plans on both the enterprise level and team level, and conducted leadership workshop sessions to improve bench strength. We believe we have the best, most passionate, productive team members and we are focused on recruitment, retention and incentivization. They are responsible for delivering the operating performance that underpins our strong financial results," concluded Given.

## Non-GAAP Financial Information (Unaudited)

In addition to the financial information prepared in conformity with accounting principles generally accepted in the United States ("GAAP"), we provide certain other non-GAAP financial information on a constant currency ("constant currency") and adjusted basis. We use constant currency results to evaluate our Latin America Pawn operations, which are denominated primarily in Mexican pesos, Guatemalan quetzales and other Latin American currencies. We believe that presentation of constant currency and adjusted results is meaningful and useful in understanding the activities and business metrics of our operations and reflect an additional way of viewing aspects of our business that, when viewed with GAAP results, provide a more complete understanding of factors and trends affecting our business. We provide non-GAAP financial information for informational purposes and to enhance understanding of our GAAP consolidated financial statements. We use this non-GAAP financial information primarily to evaluate and compare operating results across accounting periods.

Readers should consider the information in addition to, but not instead of or superior to, our financial statements prepared in accordance with GAAP. This non-GAAP financial information may be determined or calculated differently by other companies, limiting the usefulness of those measures for comparative purposes.

Constant currency results reported herein are calculated by translating consolidated balance sheet and consolidated statement of operations items denominated in local currency to U.S. dollars using the exchange rate from the prior-year comparable period, as opposed to the current period, in order to exclude the effects of foreign currency rate fluctuations. We used the end-of-period rate for balance sheet items and the average closing daily exchange rate on a monthly basis during the appropriate period for statement of operations items. The end-of-period and approximate average exchange rates for each applicable currency as compared to U.S. dollars as of and for the three and twelve months ended September 30, 2022 and 2021 were as follows:

|  | September 30, |  | Three Months Ended September 30, |  | Twelve Months Ended September 30, |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| Peruvian sol | 3.9 | 4.1 | 3.8 | 4.0 | 3.8 | 3.7 |

Our statement of operations constant currency results reflect the monthly exchange rate fluctuations and so are not directly calculable from the above rates. Constant currency results, where presented, also exclude the foreign currency gain or loss.
