

Environmental Policy

Heimstaden Bostad's work to ensure long term sustainability is founded on the principle that all people have the right to live in Friendly Homes. Our approach is long term, proactive and with the environmental focus taken into account in all our business decisions.

- Environmental aspects and biodiversity are in focus in our operations
- We continuously increase knowledge of how to live and work sustainably
- Going to – and when travelling at work - we choose the environmentally friendly alternative
- We minimise the use of dangerous substances used in our projects and homes.
- We prevent pollution which might occur through our operations.
- We minimise emissions of carbon dioxide and other greenhouse gases.
- We are resource efficient and work actively to reduce energy and water consumption as well as to optimise energy efficiency in all areas of operation.
- We practice the life cycle perspective
- We manage and separate waste according to the waste hierarchy, re-using materials in an efficient manner
- We set quantifiable goals for our environmental work and we follow through.
- We place equally high demands on our partners and suppliers as we do on ourselves
