

**International Game Technology PLC**  
**Conflict Minerals Report**  
**For the Year Ended December 31, 2022**

This Conflict Minerals Report (this “Report”) of International Game Technology PLC, a public limited company organized under the laws of England and Wales (the “Company”), for the year ended December 31, 2022, is presented to comply with Rule 13p-1 (the “Rule”) under the Securities Exchange Act of 1934, as amended (the “Exchange Act”).

Unless otherwise indicated or the context otherwise requires, as used in this Report, the terms “we,” “us,” and “our” refer to the Company and its subsidiaries.

***Glossary of terms***

As used in this Report:

- “3TG” means any of tantalum, tin, tungsten, or gold.
- “Conflict Minerals” means columbite-tantalite (coltan), cassiterite, gold, wolframite, or their derivatives; or any other mineral or its derivatives determined by the U.S. Secretary of State to be financing conflict in any of the Covered Countries.
- “CMRT” means the Conflict Minerals Reporting Template
- “Covered Countries” means the DRC and the adjoining countries.
- “Covered Products” means our manufactured or contracted for manufacture land-based machine products (including, but not limited to, slot machines, video poker machines, video lottery terminals, electronic or video bingo machines, lottery terminals, instant ticket vending machines, and ticket scanners).
- “DRC” means the Democratic Republic of the Congo.
- “EICC” means the Electronic Industry Citizenship Coalition, membership of which is open to companies that manufacture or contract the manufacture of electronic goods or of products in which electronics are essential.
- “GeSI” means the Global e-Sustainability Initiative launched on June 5, 2001, during the World Environment Day in Turin, Italy.
- “OECD” means the Organization for Economic Cooperation and Development.
- “OECD Guidance” means the due diligence Guidance issued by the OECD for responsible supply chains of minerals from conflict-affected and high-risk areas.
- “RBA” means Responsible Business Alliance. The Responsible Business Alliance is the world’s largest industry coalition dedicated to corporate social responsibility in global supply chains.
- “RCOI” means a reasonable country of origin inquiry.
- “Reporting Period” means the year ended December 31, 2022.
- “RMAP” means Responsible Minerals Assurance Process developed by RBA to enhance company capability to verify the responsible sourcing of metals.
- “RMAP-Conformant Smelters” means RMAP registered smelters/refineries whose sourcing of Conflict Minerals (and, specifically, of 3TG) is RMAP-conformant.
- “RMI” means the Responsible Minerals Initiative founded by members of the EICC and GeSI.
- “SEC” means the U.S. Securities and Exchange Commission.
- “Supplier” means a third-party vendor or supplier of necessary components in the manufacturing of Covered Products.

Pursuant to the Rule, and as further described below, we undertook due diligence measures on the source and chain of custody of Conflict Minerals (and, specifically, of 3TG) contained in Covered Products where we had reason to believe such Conflicts Minerals may have originated from Covered Countries and may not have come from recycled or scrap sources.

## ***SEC Final Rule on Conflict Minerals***

The Rule was adopted by the SEC to implement reporting and disclosure requirements related to Conflict Minerals as directed by Section 1502 of the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010. The Rule imposes certain reporting obligations on SEC registrants who manufacture or contract for manufacture products that contain Conflict Minerals which are necessary in the production or for the functionality of those products, excepting Conflict Minerals that, prior to January 31, 2013, were located "outside of the supply chain" (as defined in the Rule). For products that contain Conflict Minerals, the registrant must conduct in good faith a reasonable country of origin inquiry designed to determine whether any of the Conflict Minerals originated in any of the Covered Countries.

### **1. Company and Product Overview**

We are a global gaming company, operating and providing an integrated portfolio of technology products and services across all gaming markets, including lottery management services, online and instant lotteries, electronic gaming machines, sports betting, interactive gaming and commercial services. We provide business-to-consumer and business-to-business products and services to customers in over 100 jurisdictions.

Based upon our internal assessment, the Rule applies to the materials used in Covered Products. However, the Company does not manufacture or contract for manufacture the hardware installed within our systems technology products, and the policies and procedures described in this Report have not been applied to our systems technology products.

We recognize that the use of Conflict Minerals (and, specifically, of 3TG) is necessary in the production or for the functionality of the Covered Products. We seek to ensure that any Conflict Minerals (and, specifically, any 3TG) within the manufacturing process for our Covered Products that originate from the Covered Countries are RMAP-conformant. In furtherance of the foregoing, we have implemented policies and procedures to comply with the Rule requirements, including a Conflict Minerals Policy (the "Policy").

### **2. Conflict Minerals Diligence Program and Due Diligence Process**

The Company maintains various due diligence policies, procedures and controls to support compliance with the Rule (collectively, the "Conflict Minerals Compliance Program"). The due diligence program we employ to identify and trace Conflict Minerals (and, specifically, 3TG) in our supply chain for Covered Products aligns with the procedures and tools provided by the EICC, the GeSI, and the OECD. For the Reporting Period, we requested that Suppliers whose products contain Conflict Minerals (and, specifically, 3TG) submit information to us using the CMRT. The CMRT is a standardized reporting template developed by the RMI that facilitates the transfer of information through the supply chain regarding mineral country of origin and smelters and refiners being utilized. The CMRT was developed to facilitate disclosure and communication of information regarding smelters that provide minerals to a Supplier's supply chain. It includes questions regarding: (i) the Supplier's RMAP-conformant policy and due diligence efforts; (ii) the Supplier's engagement with its direct suppliers, including a listing of the smelters used by the Supplier and its sub-suppliers; and (iii) the origin of Conflict Minerals (and, specifically, of 3TG) included in Suppliers' products.

As communicated to our Suppliers in our Supplier Code of Conduct (the "Code"), we expect that our Suppliers have adopted a Conflict Minerals policy to reasonably assure the Company that any Conflict Minerals (and, specifically, 3TG) contained within the products they manufacture are RMAP-conformant. We expect that our Suppliers have established and implemented an appropriate due diligence program to ensure RMAP-conformance across their supply chains, and our Suppliers are expected to report the results of their due diligence efforts to us on at least an annual basis. The Company reviews all CMRT responses and maintains records of our due diligence activities, including all communications with Suppliers. We expect Suppliers to take similar measures with their sub-suppliers to ensure alignment throughout the supply chain.

We expect confirmation from Suppliers that they have adopted a Conflict Minerals policy and are following such a policy in all material respects. The Company retains the right to utilize alternate Suppliers in the event that a Supplier is unwilling or unable to meet our expectations. We also expect that our Suppliers report to us their due diligence efforts for identifying the supply chain of Conflict Minerals (and, specifically, of 3TG) within their process as well as their findings, and we retain the right to conduct enhanced diligence of certain Suppliers to ensure consistency with our Policy and Supplier requirements.

The Conflicts Minerals Compliance Program has been developed with consideration of the third edition of the OECD Guidance and the related supplements for Conflict Minerals. Specific procedures include defining Suppliers that supply Conflict Minerals, identifying risks, communicating Supplier responsibilities, utilizing a cross-functional team, collecting necessary information and maintaining records of activity, responses and conclusions.

Suppliers are responsible for reporting due diligence efforts to the Company by completing and submitting the CMRT and a Conflict Minerals policy to us on at least an annual basis. In connection with the foregoing, the Company has established a cross-functional team to manage the Conflict Minerals Compliance Program, which includes:

- identifying which Suppliers either directly provide Conflict Minerals or provide products to us containing Conflict Minerals (and, specifically, 3TG);
- distribution of a Conflict Minerals letter, a copy of the Code and a link to the RMI form to all Suppliers deemed in scope;
- tracking which Suppliers have responded to requests to complete the CMRT, as well as retention of the Suppliers' completed CMRT and Conflict Minerals policies;
- reviewing all communications and responses from Suppliers and completing further due diligence by asking follow up questions of Suppliers with missing or inconsistent responses, if warranted;

- maintaining smelter information from Suppliers and checking smelter identifications against the lists of RMAP-Conformant Smelters available at [www.conflictreesourcing.org](http://www.conflictreesourcing.org) and in the CMRT; and
- Reporting to management annually with respect to the Company's due diligence and compliance obligations.

### 3. Description of Due Diligence Measures Performed

Below is a description of the measures we performed for the Reporting Period to exercise due diligence on the source and chain of custody of Conflict Minerals (and, specifically, of 3TG) contained in the Covered Products that we had reason to believe may have originated from the Covered Countries and may not have come from recycled or scrap sources.

To identify relevant Suppliers subject to due diligence, we reviewed 66 Suppliers representing in the aggregate 95% of our 2022 spend on materials.<sup>1</sup> Starting with that population of Suppliers, we removed those Suppliers deemed out of scope. Suppliers were determined to be out of scope if the materials purchased from them either: (i) did not contain Conflict Minerals (and, specifically, 3TG); (ii) were not contracted to manufacture; or (iii) were not included in any of the Covered Products. If any uncertainty remained as to the potential inclusion of any Conflict Minerals in materials purchased from a Supplier for the Covered Products, the Supplier was considered in scope. As a result of this review, we identified 48 Suppliers in scope and 18 Suppliers out of scope, and the 48 Suppliers found in scope were subject to further due diligence.

We surveyed the 48 Suppliers in scope using the CMRT, requesting that each submit information requested by the CMRT and provide a copy of their Conflict Minerals policy. We continued to follow up with the in scope Suppliers through subsequent requests until April 26, 2023. The responses included 46 EICC/GeSI declarations and 33 Conflict Minerals policies. Thirty-seven (37) Suppliers provided smelter documentation. Among the Suppliers providing smelter documentation, 456 smelters were identified, of which 349 are RMAP-Conformant Smelters. The remaining 107 smelters identified are not currently verified as RMAP-Conformant Smelters. Please refer to Appendix A for additional information regarding smelter names, country location and mineral.

We do not have a direct relationship with smelters and refiners, nor do we perform direct audits of these smelters and refiners that provide us with Conflict Minerals (and, specifically, with 3TG) through our supply chain. We rely upon our direct Suppliers (and their sub-suppliers) as well as industry efforts, such as EICC and RMI, to influence smelters and refineries to become RMAP-Conformant Smelters.

### 4. RCOI

In connection with the RCOI, we determined that it may take time for some of our Suppliers to verify the origin of Conflict Minerals (and, specifically, of 3TG) they supply directly or indirectly to us for use in our products, as those Suppliers source materials from many sub-suppliers. Further, as part of the RCOI process, we adopted the RMI industry approach and traced back the origin of Conflict Minerals (and, specifically, of 3TG) by identifying smelters, refineries or recyclers and scrap supplier sources. We used the RMI and its RMAP to trace the mine of origin of Conflict Minerals (and, specifically, of 3TG) in materials used by our Suppliers at the enterprise level. Many Suppliers submitted CMRT responses encompassing their entire supply chains, rather than focusing only on components incorporated into the Covered Products. Although some smelters reported might not be providing material for the Covered Products, we have listed each smelter identified by our Suppliers on Appendix A. The RMAP audits smelters and refineries to ensure that all RMAP-Conformant Smelters only use ores that are Covered Countries-conflict free.

The results of our RCOI are set forth in Appendix A. Nineteen (19) of the Suppliers that provided smelter documentation to us indicated that the Conflict Minerals (and, specifically, the 3TG) supplied to them did not originate from any smelters located in any of the Covered Countries. Eighteen (18) of the Suppliers that provided smelter documentation to us reported sourced Conflict Minerals (and, specifically, sourced 3TG) from smelters located in Covered Countries, as listed in Appendix A below. Four (4) Suppliers indicated that gold was supplied to them from African Gold Refinery, located in Uganda, which is a Covered Country. Two (2) Suppliers indicated that gold was supplied to them from Universal Precious Metals Refinery located in Zambia, which is a Covered Country. Thirteen (13) Suppliers indicated that tin was supplied to them from Luna Smelter, Ltd., in Rwanda which is a Covered Country. One (1) Supplier indicated that Tantalum was supplied to them from Phoenix Metal LTD located in Rwanda, which is a Covered Country. Luna Smelter, Ltd is currently verified as a RMAP-Conformant Smelter. Universal Precious Metals Refinery, African Gold Refinery, and Phoenix Metal LTD are not currently verified as RMAP-Conformant Smelters. The Suppliers that sourced Conflict Minerals from non-RMAP-Conformant Smelters did not confirm whether any of the gold, tin or tantalum supplied to them was supplied to us during the Reporting Period. Gold, tin and tantalum are included in most of our Covered Products and are sourced from multiple Suppliers. We are unable to trace, without unreasonable effort, which of the Covered Products included gold, tin or tantalum from these Suppliers during the reporting period. As a result, we are unable to reliably determine whether any of the necessary Conflict Minerals in the Covered Products originated in the Covered Countries or whether such Conflict Minerals were entirely from recycled or scrap sources or were from other conflict-free sources.

### 5. Cautionary Statement Regarding Forward-Looking Statements

This Report may contain forward-looking statements (including within the meaning of the Private Securities Litigation Reform Act of 1995) concerning International Game Technology PLC and its consolidated subsidiaries (the "Company") and other matters. These

<sup>1</sup> The number of Suppliers representing the source of the vast majority of materials used in our manufacturing significantly declined since the previous year, as a result of concentration of manufacturing on a few selected main suppliers and termination of several low-spend suppliers, in pursuance of cost saving strategies.

statements may discuss goals, intentions, and expectations as to future plans, trends, events, actions, and regulatory requirements based on current beliefs of the management of the Company as well as assumptions made by, and information currently available to, such management. Forward-looking statements may be accompanied by words such as “aim,” “anticipate,” “believe,” “plan,” “could,” “would,” “should,” “shall,” “continue,” “estimate,” “expect,” “forecast,” “future,” “guidance,” “intend,” “may,” “will,” “possible,” “potential,” “predict,” “project” or the negative or other variations of them. These forward-looking statements speak only as of the date on which such statements are made and are subject to various risks and uncertainties, many of which are outside the Company’s control. Should one or more of these risks or uncertainties materialize, or should any of the underlying assumptions prove incorrect, actual results may differ materially from those predicted in the forward-looking statements and from past results, performance, or achievements. Therefore, you should not place undue reliance on such statements. Factors that could cause actual results to differ materially from those in the forward-looking statements include (but are not limited to) the factors and risks described in the Company’s annual report on Form 20-F for the financial year ended December 31, 2022 and other documents filed from time to time with the SEC, which are available on the SEC’s website at [www.sec.gov](http://www.sec.gov) and on the investor relations section of the Company’s website at [www.IGT.com](http://www.IGT.com). Except as required under applicable law, the Company does not assume any obligation to update these forward-looking statements. You should carefully consider these factors and other risks and uncertainties that affect the Company’s business. All forward-looking statements contained in this Report are qualified in their entirety by this cautionary statement. All subsequent written or oral forward-looking statements attributable to International Game Technology PLC, or persons acting on its behalf, are expressly qualified in their entirety by this cautionary statement.
