DISCO First to Bring Scaled Agentic AI to Legal Tech

2026-02-09

First of its kind, large-scale “deep-thinking” capabilities bring richer, more comprehensive analysis to industry’s leading legal tech platform

AUSTIN, Texas--(BUSINESS WIRE)-- **DISCO** (NYSE: LAW), a creator of industry-leading litigation technology, today announced the industry’s first scaled agentic AI tool for fact investigation and eDiscovery.

The significant enhancement to DISCO’s AI-enabled technology platform adds an autonomous, multi-step reasoning engine to its Cecilia Q&A tool that returns significantly more detailed and thorough results – even on very large data sets. The result is not just greater speed to evidence, it’s greater speed to the most relevant and important evidence from the outset of an investigation, all at enterprise scale.

“While much of the industry is focused on narrow agentic AI applications for tasks like contract review or brief writing, DISCO is transforming the way legal work is done by applying agentic power at scale to the world’s largest and most complex legal matters,” said CEO Eric Friedrichsen.

“Our agentic Q&A tool brings deeper analysis, recognizes next-level, highly nuanced connections and offers the potential to transform reviews from a tick-the-box exercise into a critical part of litigation case strategy. This is more than just an AI plug-in. It’s purpose-built technology for a new and better way to approach fact investigation and document review.”

DISCO’s cloud-native agentic Cecilia capabilities are built on its platform’s strict security and privacy standards and are designed specifically for the types of large and complex eDiscovery environments that are commonplace in modern litigation. The tool will be widely available later this year and will be included at no additional cost.

DISCO's agentic capabilities – like all of its solutions – are supported by teams of AI, eDiscovery and litigation experts to ensure customers get the most out of the platform at every step and in every case.

“Every week the market is flooded with new AI products claiming to automate some general aspect of legal practice. The reality is that most miss the mark on large, complex workflows and the specific needs of today's litigators,” said Chief Product, Technology and Strategy Officer Richard Crum. “Building scaled and secure solutions capable of handling real-world use cases of millions of documents and many terabytes of data requires significant infrastructure and expertise – developed over years – that we're putting in the hands of our customers with our agentic solution.”

DISCO's new agentic AI tool will be on display at its booth throughout **Legalweek**. Interested customers are invited to stop by for a product demonstration. DISCO will also provide updates about its new agentic offering at <https://csdisco.com/agentic-cecilia-ai>.

Forward-Looking Statements

This press release contains forward-looking statements, including, among other things, statements regarding the capabilities and benefits of DISCO's agentic AI tool and the public release of the agentic AI tool in 2026.

Words such as “may,” “should,” “will,” “believe,” “expect,” “anticipate,” “target,” “continue,” “potential,” “build,” “extend” and similar phrases that denote future expectation or intent regarding DISCO's business are intended to identify forward-looking statements. You should not rely upon forward-looking statements as predictions of future events.

The forward-looking statements contained in this press release are subject to a variety of risks, uncertainties, and factors, including those more fully described in our filings with the Securities and Exchange Commission (“SEC”), including our Quarterly Report on Form 10-Q for the quarterly period ended September 30, 2025, filed with the SEC on November 5, 2025. Further information on potential risks that could affect actual results will be included in the subsequent periodic and current reports and other filings that we make with the SEC from time to time.

Forward-looking statements represent DISCO's management's beliefs and assumptions only as of the date such statements are made. We undertake no obligation to update any forward-looking statements made in this press release to reflect events or circumstances after the date of this press release or to reflect new information or the occurrence of unanticipated events, except as required by law.
