# DISCO Unveils Cecilia Doc Summaries, an AI-Powered Tool That Simplifies Analysis of Complex Legal Document Sets

5/9/2024

Legal technology company continues to roll out advanced generative AI capabilities that enable legal professionals to quickly understand lengthy case documents and speed up time to evidence

AUSTIN, Texas--(BUSINESS WIRE)-- **DISCO** (NYSE: LAW), a leader in AI-enabled legal technology, announced today the launch of Cecilia doc summaries, a Cecilia AI feature that is now available for free to all current DISCO Ediscovery users. Cecilia doc summaries is a generative AI tool that provides detailed and high-level takeaways of individual documents at a user's request, and lets legal teams sift through hundreds of pages of documents to find the information and facts that are most relevant to the case.

The nature of everyday legal work is evolving fast, as technology-enabled change continues to have a transformative impact on the industry. One challenge attorneys still face is having to parse through long documents and foreign language text, which can slow down review and lead to key pieces of information being missed. Cecilia doc summaries is a tool that lets teams expedite lengthy and tedious review processes, especially those with longer, more technical, or even foreign language documents, so they can more quickly orient themselves on the more important overarching themes within a specific legal document set. Users can easily, for example, distill the key points from a long report or contract; receive a comprehensive breakdown of a foreign language document in plain English; or obtain a summary of a new hot document found by Cecilia Q&A before sharing it with the case team — all with one click of a button.

"Over a short period of time, DISCO has made tremendous strides in delivering market-ready generative AI solutions, and we continue to be laser-focused on building products that provide tangible value to our customers,"

said Kevin Smith, DISCO's Chief Product Officer. "This is another example of how we are driving meaningful AI innovation in the space, and creating products that drive better outcomes for lawyers so they can shift their resources to focus on higher-value work."

DISCO's Cecilia AI platform includes generative AI offerings like Cecilia Q&A, a tool that allows users to ask natural language questions about the documents in their databases and receive detailed narrative responses along with specific source citations. Cecilia doc summaries is a feature within DISCO Ediscovery, a product that includes industry-leading AI tools for speeding up time to evidence. ## Forward-Looking Statement

This press release contains forward-looking statements regarding Cecilia doc summaries, including, among other things, the potential benefits derived from the use of Cecilia doc summaries, the impact of technology-enabled change on the legal industry, and DISCO's ability to create products that drive better outcomes for lawyers. Words such as "may," "should," "will," "believe," "expect," "anticipate," "target," "project," and similar phrases that denote future expectation or intent regarding DISCO's financial results, operations, and other matters are intended to identify forward-looking statements. You should not rely upon forward-looking statements as predictions of future events.

The forward-looking statements contained in this press release are subject to a variety of risks, uncertainties, and factors, including those more fully described in our filings with the Securities and Exchange Commission ("SEC"), including our Annual Report on Form 10-K for the year ended December 31, 2023, filed with the SEC on February 22, 2024. Further information on potential risks that could affect actual results will be included in the subsequent periodic and current reports and other filings that we make with the SEC from time to time, including our Quarterly Report on Form 10-Q for the quarter ended March 31, 2024. Forward-looking statements represent DISCO's management's beliefs and assumptions only as of the date such statements are made. We undertake no obligation to update any forward-looking statements made in this press release to reflect events or circumstances after the date of this press release or to reflect new information or the occurrence of unanticipated events, except as required by law.

## About DISCO

DISCO (NYSE: LAW) provides cloud-native, artificial intelligence-powered legal product offerings that simplify legal hold, legal request, ediscovery, legal document review and case management for enterprises, law firms, legal services providers, and governments. Our scalable, integrated product offerings enable legal departments to easily collect, process and review enterprise data that is relevant or potentially relevant to legal matters.
