

Curtiss-Wright Awarded \$11 Million Order By Sincor

ROSELAND, N.J., March 1, 2007 /PRNewswire-FirstCall via COMTEX News Network/ -- Curtiss-Wright Corporation (NYSE: CW) announced today that it received an order from Sincrudos de Oriente SINCOR CA, in excess of \$11 million to provide six DeltaGuard® coke drum unheading systems, DeltaGlides (installation/maintenance systems) and additional equipment. This order, which is the largest order received from South America for the company's coker valve systems, is expected to be installed at Sincor's upgrader plant in Jose, Venezuela at the end of 2007. DeltaValve is a division of Curtiss-Wright's Flow Control segment.

"Our automated DeltaGuard unheading system and related equipment continue to receive outstanding global market acceptance throughout the oil refining industry," said Curtiss-Wright Chairman and CEO Martin R. Benante. "In addition to the unsurpassed safety record of the DeltaGuard, it also provides significant economic advantages by reducing cycle times, thus increasing throughput, minimizing maintenance costs, and enables refineries to process less expensive, heavier grades of crude oil. At the price of crude oil today, these savings can be significant."

The DeltaGuard valve is used in the process of delayed coking to safely unhead (open) the top or bottom of a coke drum. Unlike most unheading systems, the incorporation of the DeltaGuard technology into a refinery's coking process creates a totally enclosed coking system, minimizing any exposure to personnel during the coke unheading process. These six DeltaGuard system installations will bring the worldwide total to 137, representing 21% of the worldwide market.

Sincor, headquartered in Caracas, Venezuela, is a consortium of companies, including TOTAL VENEZUELA, S.A. (Total S.A. of France), PDVSA SINCOR, C.A. (Petroleos de Venezuela, S.A. of Venezuela), and STATOIL SINCOR AS (Statoil ASA of Norway), which partnered to develop oil reserves located in the Orinoco Belt, a territory which occupies the southern strip of the eastern Orinoco River Basin in Venezuela. This territory is estimated to have the world's largest reserve of extra-heavy crude oil.

About Curtiss-Wright
