Second Quarter 2021 Product Innovation Highlights

VTEX Intelligent Search now can leverage VTEX OMS and inventory intelligence to regionalize search results, increasing conversion. VTEX OMS also launched a new feature allowing customers to manage their capacity for scheduled deliveries, aiming to improve the precision of promised SLAs to shoppers and % of SLAs kept on scheduled deliveries.
- VTEX launched selected features to **improve local differentiation** in some strategic markets. In Brazil, new payment parameters were added to native integrations for our customers to comply with new marketplace regulation. In Argentina, checkout geolocation precision was enhanced to improve conversion. In the US, OMS reports added local tax business rules.
- The new VTEX Admin with a new consistent user interface and a new sales dashboard is being rolled out and was launched to all US customers. Furthermore VTEX continues to **evolve** its product in a way that **removes usability friction** for enterprise users and enhanced user experiences to manage inventory, create promotions, and for marketplace operators to evaluate and catalog new offers from sellers.

Business Outlook

We are seeing the economy slowly recover in 2021, rebounding from the contraction of 2020, due to the adverse effects of the COVID-19 pandemic.

Online commerce penetration in Latin America continues at a higher level than it was pre-pandemic, demonstrating that the 2020 quarantine-related acceleration in online consumption appears sustainable, even as brick-and-mortar retail stores gradually reopen throughout the region.

Our customers with brick-and-mortar retail presence can now operate an omni-channel strategy. We expect our business to face similar year-over-year trends in the third quarter and start to normalize towards the end of 2021. We believe that the strong sector tailwinds will continue to drive our growth and overall ecommerce growth rates in the region, despite the near-term year-over-year comps. We expect seasonal patterns to remain the same as in prior years and expect that our revenue will grow sequentially for the remaining quarters in 2021.

In view of the aforementioned trends and VTEX's performance during the six months ending June 30, 2021, we currently expect to deliver growth at healthy levels. We are targeting revenue in the **US\$31.0 million** to **US\$31.5 million** range for the third quarter of 2021, and **US\$124 million** to **US\$126 million** range for the fiscal year ended December 31, 2021, assuming current period FX rates.

Importantly, we will continue to invest to grow our business as we work towards continuing to enhance our leadership position in Latin America and explore new opportunities outside the region.

The business outlook provided above constitutes forward-looking information within the meaning of applicable securities laws and is based on a number of assumptions and subject to a number of risks. Actual results could vary materially as a result of numerous factors, including certain risk factors, many of which are beyond VTEX's control. See the cautionary note regarding "Forward-Looking Statements" below. Fluctuations in VTEX's operating results may be particularly pronounced in the current economic environment. There can not be assurance that VTEX will achieve these results.
