

Kimball Electronics – Romania Achieves ISO 9001:2008 Certification

February 22, 2016

TIMISOARA, Romania, Feb. 22, 2016 (GLOBE NEWSWIRE) -- Kimball Electronics (NASDAQ:KE) announced it has received ISO 9001:2008 certification at their newly opened facility in Timisoara, Romania. Kimball Electronics is a global top-twenty-ranked electronic manufacturing services ("EMS") company that specializes in durable electronics in the medical, automotive, industrial controls, and public safety industries.

Certification to ISO 9001 requires an accredited third party to thoroughly review and audit the Company's internal quality management system. The audit is designed to ensure the organization is capable of reliably meeting the needs and expectations of their customers with a focus on manufacturing products to the highest quality, engineering and safety standards.

Kimball Electronics - Romania is the seventh and most recent addition to Kimball's global manufacturing foot print. "At Kimball Electronics - Romania it is our policy to first understand our customers' needs and expectations. We then develop a supply chain and design a manufacturing process that will ensure we are consistently producing top quality products helping to ensure the success of our customers. Verification of our procedures and systems by an independent third party who understands ISO 9001 and Quality Management Systems as well as the industry in which we operate, is a testament to our commitment to high standards for our customers," stated Dan Copocean, General Manager of Kimball Electronics - Romania.

"We are proud to now have ISO 9001:2008 certification in all seven of our manufacturing facilities. The addition of this certification to our Romania facility will allow us to continue to support our customers' needs within the rapidly expanding European market," stated Janusz Kasprzyk, Kimball Electronics Vice President of European Operations.

The ISO 9001:2008 quality management standard was developed and published by the International Organization for Standardization (ISO). It defines the fundamentals of an effective quality management program for manufacturing companies. Important components of ISO 9001:2008 include customer satisfaction and establishing processes for continuous improvement, which Kimball Electronics values highly.
