Carter & Burgess – 2012 Study (National Site Selection Company) "Manufacturers of industrial machinery find the Rockford Area to be an ideal location. Several factors come in to play, including the cities highly skilled work force, the availability of highly specialized existing facilities, and a strong, qualified supplier base. The region's central location (close to Chicago, Milwaukee, etc.) and close proximity to key transportation assets (airports, roads, and rails) are an additional benefit. The Rockford Region maintains a much higher concentration of skilled metal – working employees than the national average."
