## **Section 1 – Conflict Minerals Disclosure**

### **Item 1.01 Conflict Minerals Disclosure and Report**

#### ***Background***

This Specialized Disclosure Report on Form SD ("Form SD") of Global Industrial Company (the "Company") is filed pursuant to Rule 13p-1 promulgated under the Securities Exchange Act of 1934, as amended (the "Rule"), for the reporting period January 1 to December 31, 2021 (the "Reporting Period").

The Rule requires disclosure of certain information when a company manufactures or contracts to manufacture products for which the minerals specified in the Rule are necessary to the functionality or production of those products. The specified minerals are gold, columbite-tantalite (coltan), cassiterite and wolframite, including their derivatives, which are limited to tantalum, tin and tungsten (the "3TG Minerals"). The "Covered Countries" for purposes of Rule 13p-1 are the Democratic Republic of Congo, the Republic of the Congo, the Central African Republic, South Sudan, Uganda, Rwanda, Burundi, Tanzania, Zambia and Angola.

#### ***Company Overview***

The Company, through its operating subsidiaries, is a value-added distributor. During the Reporting Period, the Company through its operating subsidiaries contracted to manufacture certain industrial products ("Covered Products") with third party manufacturers and factories (the "Suppliers") and marketed the Covered Products on a private label basis. Neither the Company directly nor through its subsidiaries actually manufactures any Covered Products itself.

#### ***Reasonable Country of Origin Inquiry/Conclusion***

In accordance with the Rule, the Company has conducted a good faith reasonable country of origin inquiry regarding the 3TG Minerals. This good faith reasonable country of origin inquiry was reasonably designed to determine whether any of the 3TG Minerals originated in the Covered Countries and whether any of the 3TG Minerals may be from recycled or scrap sources.

To determine whether necessary 3TG Minerals in the Covered Products originated in Covered Countries, the Company retained a third-party service provider, to assist in reviewing the supply chain and identifying risks (the "Compliance Provider"). To trace 3TG Minerals, and demonstrate transparency of 3TG Minerals procured by the Suppliers, the Company utilized the Conflict Minerals Reporting Template ("CMRT") Version 6.1 to conduct a survey of all Suppliers.

The process that the Company utilized to determine the country of origin for the 3TG Minerals included: (1) conducting an internal assessment of the Company's product portfolio to determine which products contain or may contain 3TG Minerals; (2) contacting Suppliers of the Covered Products via a software-as-a-service platform provided by the Compliance Provider that enables users to complete and track supplier communications, and allows suppliers to upload completed CMRTs directly to the platform for validation, assessment and management; (3) requesting all Suppliers complete a CMRT; (4) assessing the survey responses from the Suppliers; (5) conducting follow-up with the Suppliers, if necessary; and (6) requesting written representations from the Suppliers regarding the sourcing and use of 3TG Minerals.

Based on the above referenced reasonable country of origin inquiry, the Company determined that it has no reason to believe that the 3TG Minerals that are necessary to the functionality or production of the Covered Products that it contracted to manufacture may have originated in the Covered Countries or were not from recycled or scrap sources.

#### ***Website Disclosure***

This Form SD is publicly available on the Company's website at <https://investors.globalindustrial.com/financials/sec-filings>. The URL is included here as an inactive textual reference. The content of the Company's website referred to in this Form SD is included for general information only and is not incorporated by reference in this Form SD.
